Turnover

- U10 has **maintained its volume of activity** in the first half of 2022 in a market that has been severely disrupted in terms of general consumption and retailer traffic. Despite a 2021 baseline effect that is the highest it has been for five years, sales have remained almost equivalent.
- In Europe, business volume has exceeded that of 2019, pre-pandemic, and has remained stable compared to the particularly high first half of 2021.
- Exports from the Asian office are still being disadvantaged by the continued absence of international trade fairs and a more unstable health situation.

News and Outlook

- While staying the course in terms of its development, U10 knows how to preserve its business volume in this very unusual period.

U10 is specialised in B to B trade in the interior decorating sector
